Experiment 10: Student Information System Using Cloud Computing

Aim

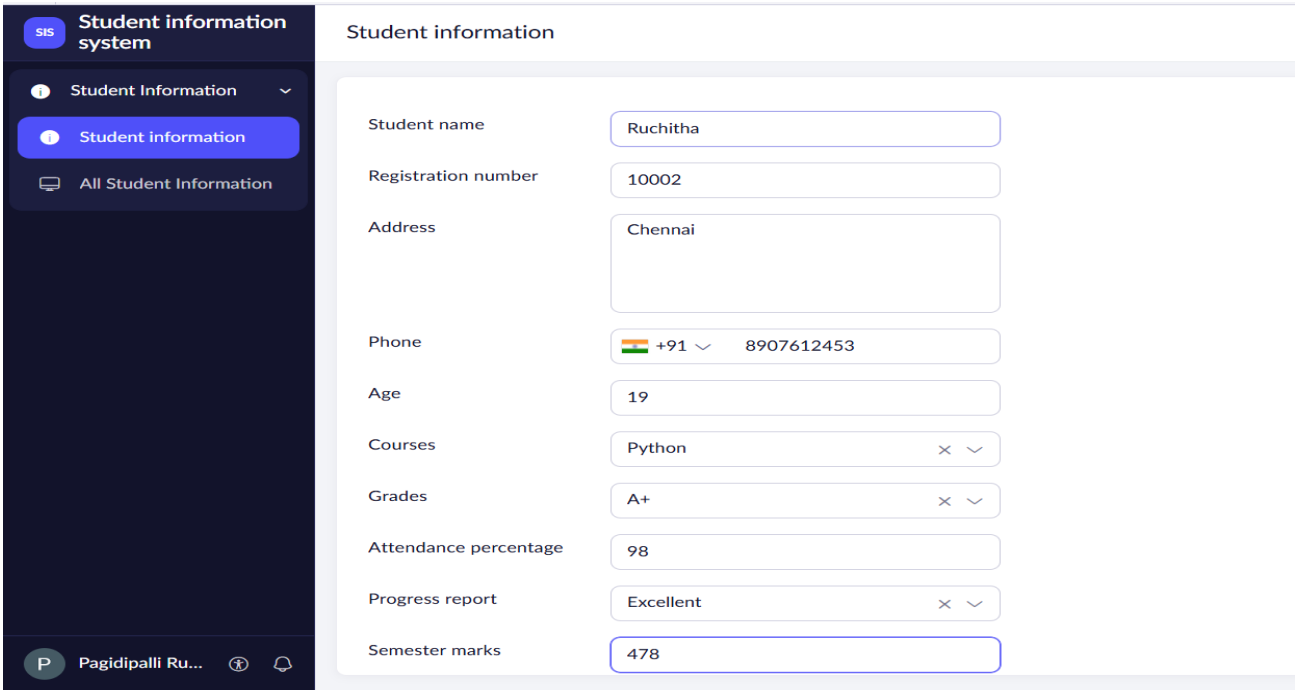

To create a simple cloud-based software application using Zoho Creator to store and display student information, including personal details, grades, attendance reports, progress reports, and semester mark sheets, demonstrating SaaS.

Algorithm

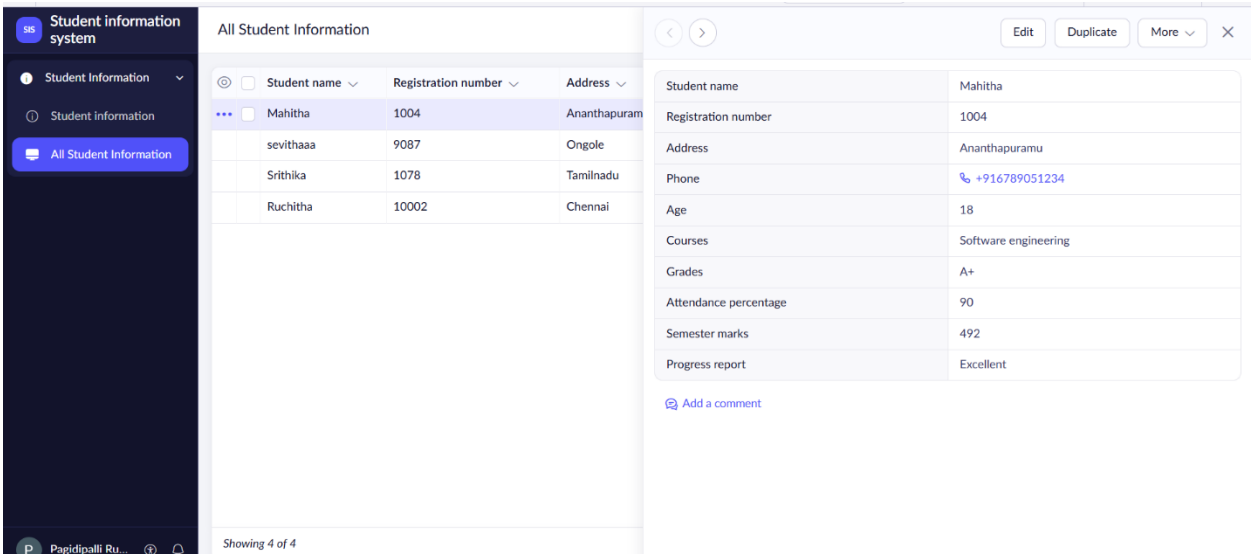

1. Open Zoho Creator and sign in.
2. Create a new application named Student Information System.
3. Create a form named Student Information.
4. Add fields for student name, registration number, address, phone, and age.
5. Add fields for courses and grades.
6. Create an Attendance Report form.
7. Create a Progress Report form.
8. Create a Semester Mark Sheet form and save the application.
9. Enter student details, view the records, and verify the application.

Implementation

Input

Output

Result

Thus, a cloud-based Student Information System was created successfully using Zoho Creator to store and display student details, grades, attendance, progress reports, and semester mark sheets, demonstrating SaaS.
