Experiment 4: Library Book Reservation System

Aim

To create a simple cloud-based Library Book Reservation System for SIMATS Library using a cloud service provider to demonstrate SaaS.

Algorithm

1. Open Zoho Creator and create a new application.

2. Create a form named Library Book Reservation System.

3. Add fields such as Title of the Book, Author, Publication, Year, and Edition.

4. Add fields for Number of Copies and Rack Number.

5. Create a Status field with the options Available, Taken, and Returned.

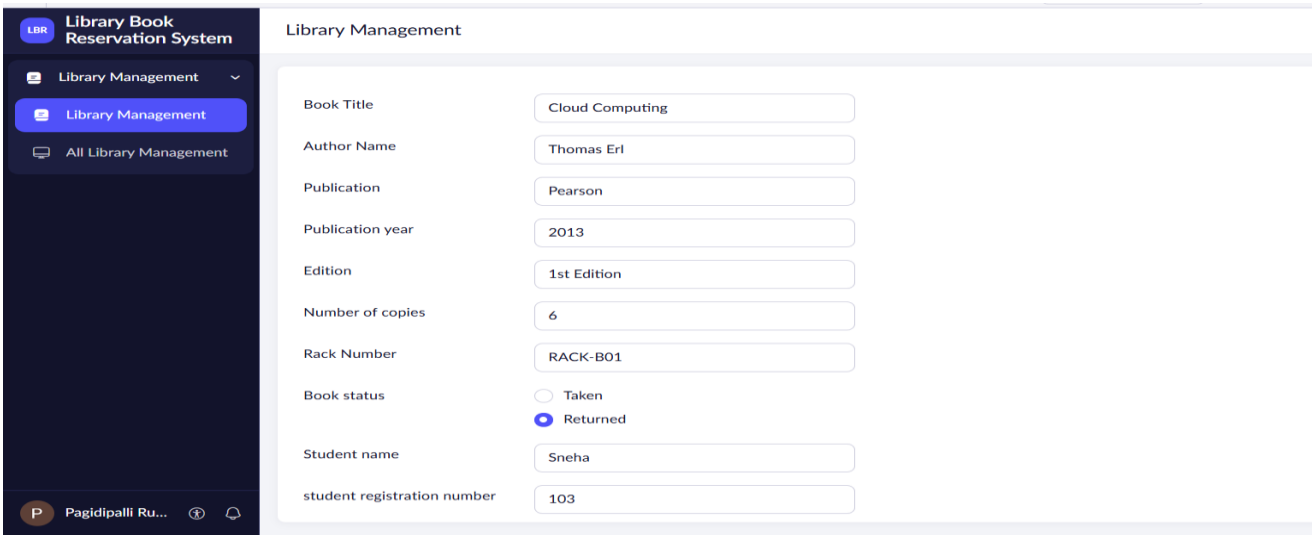

6. Save the form and publish the application.

7. Enter book details and update the book status when books are borrowed or returned.

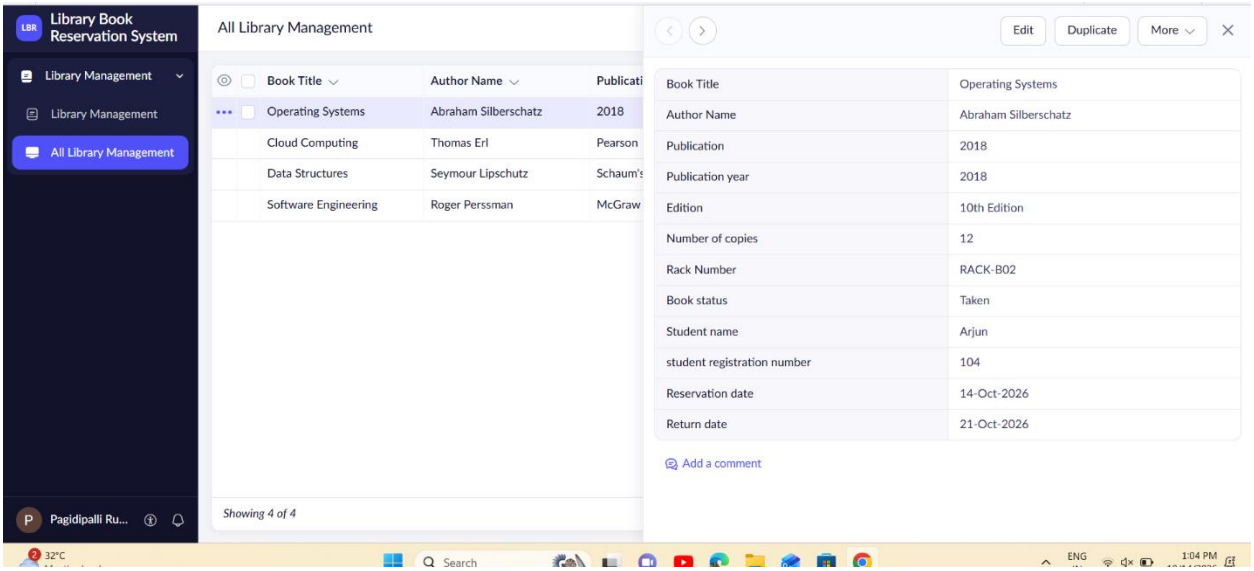

8. View the submitted book records.

Implementation

Input

Output

Result

Thus, a cloud-based Library Book Reservation System was created successfully to manage book details and reservation status in SIMATS Library.
