Experiment 6: Payroll Processing System

Aim

To create a simple cloud-based Payroll Processing System using a cloud service provider to demonstrate SaaS.

Algorithm

1. Open Zoho Creator and create a new application.

2. Create a form named Payroll Processing System.

3. Add fields such as Employee Name, Employee ID, and Experience in the Present Organization.

4. Add a field for Overall Experience.

5. Add salary fields such as Basic Pay, HRA, DA, and TA.

6. Calculate Gross Pay by adding Basic Pay, HRA, DA, and TA.

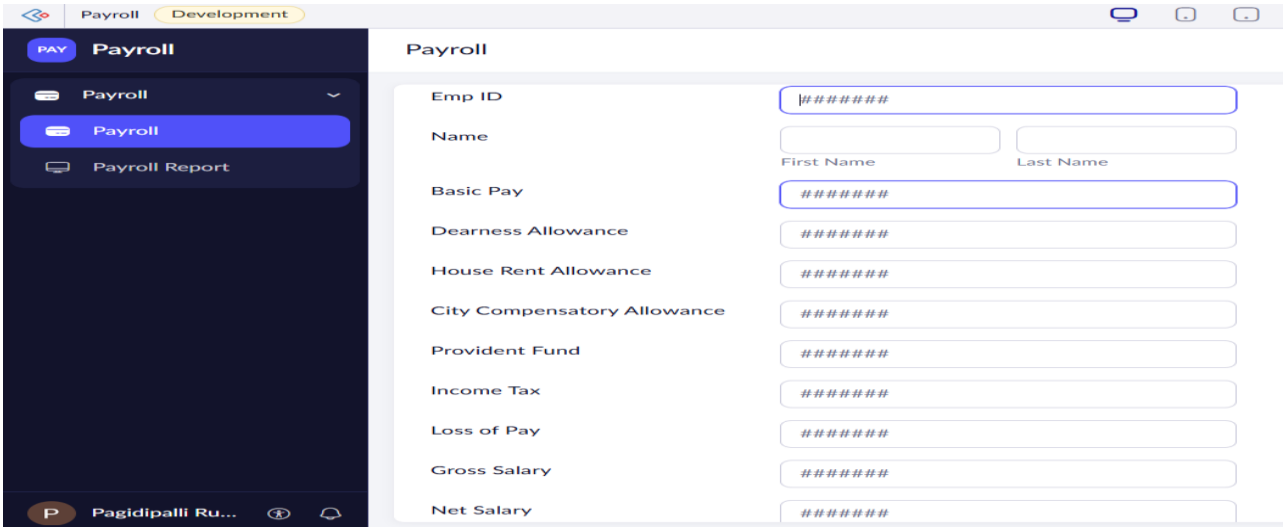

7. Calculate Net Pay by subtracting applicable deductions from Gross Pay.

8. Save the form and publish the application.

9. Enter employee details and view the payroll records.

Implementation

Input

Output

Payroll Report

Emp ID	Name	Basic Pay	Dearness Allowance	House Rent Allowance	City Compensatory Allowance	Provident Fund
27865	Samyuktha Devi	90000	4500	6000	2500	3500
29876	Lakshmi Narasimha	70000	3000	5000	1600	2500
26789	Shiva Nandhan	100000	5000	7000	2000	4000
24567	Lakshmi Parvathi	50000	6000	5500	1800	3500
23245	Vikram Aditya	10000	800	1000	1200	500

Result

Thus, a cloud-based Payroll Processing System was created successfully to manage employee salary details and demonstrate SaaS.

Note: Gross Pay and Net Pay calculations depend on the salary components and deductions configured in the application.
